PREFACE

**Redlined: The History of Race and Real Estate in
Cleveland & Its Relationship to Health Equity Today**

“The proposed mall will wipe out this squalid neighborhood, and in its place provide a park and some of the best building sites in the city”

- Understanding today’s environmental landscape and built environment requires historical context
- There were a number of development practices and policies which have shaped our current built environment and human settlement patterns
- Today’s built environment is not a “natural landscape” but is influenced deeply by these development practices

The Importance of Urban Development History

- Racial and social exclusion, and exploitation were primary driving forces in 20th century urban development
- When we look at today's landscape of inequality, we must understand the historical drivers which created this landscape

Understanding Our Conflicted History of
Race, Class & Real Estate

Our Analysis: Testing the Theories on how Redlining Impacts Cities & Racial Equity

Health & The Life Course Perspective

What About a Neighborhood's Life Course Perspective?

CLEVELAND HISTORY

A City of Industrial Proportions

Historic Overview

- “Cleaveland” is founded in 1796
- 1903 City Plan
- Peak population of 914,808 in 1950
- 1969 Cuyahoga River Fire
- 1990s Downtown Revitalization
- 2000s Foreclosure Crisis
- “Local Food and Medical Center” Revival?

Cleveland, 1877

CLEVELAND, O., CUYAHOGA RIVER FROM SW

Turning Point in Environmental Protection

Cuyahoga County River Fire 1969

"In the 1930s, when most people in Cleveland worked in factories, a fire on the river was considered just a nuisance. ... By the 60's, there was a hunger for symbols of humans' insensitivity to the environment, and the 1969 Cuyahoga fire provided a bright, vivid national icon."

Following the Cuyahoga River fire of 1969 and Love Canal in the mid-70s, the US entered an era of water quality acts: Clean Water Act (1972), Drinking Water Act (1974), and the Superfund Act (1980)

Jonathan Adler, Case Western Reserve University, quoted in Christopher Maag (2009). "From the Ashes of '69, a River Reborn." *New York Times*, 21 June, p. 18.

ZONED OUT

The Racial Origins of Zoning

Baltimore: Passes First Racial Zoning Ordinance in 1910/1911 (Used Public Health Language as Justification)

"Blacks should be quarantined in isolated slums in order to reduce the incidents of civil disturbance, to prevent the spread of communicable disease into the nearby White neighborhoods, and to protect property values among the White majority."

Baltimore Mayor Bary Mahool, 1910

BALTIMORE TRIES DRASTIC PLAN OF RACE SEGREGATION

Strange Situation Which Led the Oriole City to Adopt the Most Pronounced "Jim Crow" Measure on Record.

Councilman Samuel L. West, Who Introduced the Segregation Ordinance.

On the Monday, Dec. 13, the Council of Baltimore passed and the City Board what was probably the most remarkable ordinance ever enacted upon the records of any city in this country, certain it is that it is unique in legislation. Federal, State, or municipal—no ordinance has ever reached in the United States that more nearly comes to the mark than that which is to be added to the laws of Baltimore.

George W. McMechen, a Negro Lawyer, Whose Occupancy of the House, 1434 McCulloch Street, Caused the Segregation Ordinance.

George W. McMechen, a Negro Lawyer, Whose Occupancy of the House, 1434 McCulloch Street, Caused the Segregation Ordinance.

tempt to worm their way into the white residential districts, but for years and years, however, they have been kept out of the residential zone by the white residential streets, have been given over to those, whether or not as the negro appears in the white man's eyes.

Milton Daschelt, Author of the Ordinance.

It is believed that the ordinance will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country. It is believed that the ordinance will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country.

City Solicitor Edgar Allan Poe.

Some plans to separate the two races, add to others to allow them to mingle? The ordinance is a drastic measure, but it is believed that it will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country.

Mayor J. Barry Mahool of Baltimore.

House 1434 McCulloch Street in Which a Negro Lawyer Named McMechen Moved in June, 1910, and Which Promptly Had Its Windows Broken, as Shown in the Cut.

Home 1434 McCulloch Street in Which a Negro Lawyer Named McMechen Moved in June, 1910, and Which Promptly Had Its Windows Broken, as Shown in the Cut.

Home 1434 McCulloch Street in Which a Negro Lawyer Named McMechen Moved in June, 1910, and Which Promptly Had Its Windows Broken, as Shown in the Cut.

Home 1434 McCulloch Street in Which a Negro Lawyer Named McMechen Moved in June, 1910, and Which Promptly Had Its Windows Broken, as Shown in the Cut.

Argyle Avenue, Another Street Where Values Have Been Greatly Affected by Negro Tenants.

But the idea of their coming to the most of the city is not a new one. It is believed that the ordinance will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country.

It is believed that the ordinance will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country.

It is believed that the ordinance will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country.

It is believed that the ordinance will be better qualified to reach than any other measure of the kind ever proposed or consummated in this country.

Racial Zoning, Expulsive Zoning, Exclusionary Zoning

- Zoning used to prevent certain populations from living in a community
 - Protect economic interests of communities
- Great Migration and Urbanization
 - Cleveland's African American population grows from 8,500 to 72,000 between 1910 and 1930
- Racial Zoning was struck down in 1917, but the racist character persisted
 - Aggressive use of racially/ethnically restrictive covenants
 - Expulsive zoning: Undesirable land uses targeted to low income and or racial/ethnic communities
 - Use of zoning to restrict specific housing types
- Village of Euclid, Ohio v Ambler Realty Co
 - Zoning Practices Spread

Baltimore Racial Zoning Campaign Advertisement

Racial Covenants

- Covenant is a contract imposed on the deed of a buyer of property
- Mutual agreements between property owners that prevented sale to certain people based on race
- Became common after 1926-
Corrigan vs Buckley- Affirmed the right of private individuals to impose covenants
- Reflected the rise of the KKK and the suburban boom of the 1920s
- Maintained racial segregation

said Tracts to a corporation or association formed by residents or owners of property in Innis Arden No. 2, or to a corporation or association formed by residents or owners of Innis Arden, for community purposes, in the activities of which corporation or association residents of Innis Arden No. 2 shall have the right to participate, subject to reasonable restrictions and requirements imposed by such corporation or association.

14. *RACIAL RESTRICTIONS*...No property in said addition shall at any time be sold, conveyed, rented or leased in whole or in part to any person or persons not of the White or Caucasian race. No person other than one of the White or Caucasian race shall be permitted to occupy any property in said addition or portion thereof or building thereon except a domestic servant actually employed by a person of the White or Caucasian race where the latter is an occupant of such property.

15. *ANIMALS*. No hogs, cattle, horses, sheep, goats, or or similar livestock shall be permitted or maintained on said property at any time. Chicken hens, pigeons, rabbits and other similar small livestock, not exceeding a total of twenty-five in number, shall be permitted but must be kept on the premises of the owner. Not more than one dog and cat may be kept for each building site. No pen, yard, run, hutch, coop or other structure or area for the housing and keeping of the above described poultry or animals shall be built or maintained closer

Covenants in Ohio & Cleveland

- Covenants were prolific throughout Ohio's major urban areas
 - A study of Columbus developments from 1921 to 1935 found 67 of 101 (or 67% of all) subdivisions platted & developed during this time to included restrictive convents
- In Cleveland, According to an NAACP branch report:
 - By 1914 Cleveland housing exhibited “a noticeable tendency toward inserting clauses in real estate deeds restricting the transfer of the property to **colored people, Jews, and foreigners generally.**”
 - Source: African Americans and the Color Line in Ohio, 1915-1930.

None of the said lands, interests therein or improvements thereon shall be sold, resold, conveyed, leased, rented to or in any way used, occupied or acquired by any person of Negro blood or to any person of the Semitic race, blood, or origin which racial description shall be deemed to include Armenians, Jews, Hebrews, Persians or Syrians.

JEWISH
HISTORICAL SOCIETY OF
GREATER WASHINGTON

Covenants in Cleveland

- Case Study: Shaker Heights & Forest Hill
 - *“surroundings ... where your neighbors are inevitably people of tastes in common with yours The careful restrictions placed on Forest Hill today will never be lowered.”*
 - Advertisement by Abeyton Realty, developer of the Forest Hill allotment in Cleveland Heights 1929
- Covenants in Shaker Heights and Forest Hill often did not specify racial restrictions, but required the consent of the developer and neighbors to sell
- Shaker Heights neighborhood associations and developers aggressively pushed covenants
 - *“ever-present menace to every resident of Shaker Village and throughout Cleveland.... Unless a street is 100% signed up for restrictions, ... the danger of an undesirable neighbor is an ever-present one.”*
 - Shaker Heights Protective Association 1925

Implications

- Segregation
- Urban Form
- Capital Interests
- Diversity and Race as undesirable
- Blocked black land ownership and suburban access

for the Study of Race and Ethnicity

PLANNED DISINVESTMENT

An Overview of Home Owner's Loan Corporation Maps

Mapping Neighborhoods and Lending Practices

- Neighborhood Evolution Theory
 - Filtering, or trickle-down, model of neighborhood life cycle
 - Became the basis of principles used by FHA
 - Intellectual justification for Redlining
- What is Redlining?
 - A process to grade geographic areas for the purpose of real estate lending
 - Assessments made in the early 1930's

Security Maps as Discrimination

- Home Owners' Loan Corporation, 1933
 - Residential Security Maps
 - Type A, B, C, D
- Maps were used to determine who could live where, and for how much
 - Color coding indicated how much federal backing a loan would receive
 - Red areas received no backing; Yellow areas (received 15% backing) (essentially cutting these areas off from loans made)
 - Desirable areas received up to 80% federal backing
 - Subprime mortgages and lenders

Ripple Effects of Disinvestment

- Institutionalized existing biases and discriminatory practices
 - Subjective and openly discriminatory; race, ethnicity and social class were used as determinants of security
 - Physical environmental conditions were also considered
 - Emphasis on garden suburbs as the ideal built environment
 - Urban areas were seen as more risky, often penalized
- HOLC maps influential in lending activities for decades
 - Consulted by the FHA up until the 1960s

AREA DESCRIPTIONS - SECURITY MAP OF Cuyahoga County

This is a fairly new section; majority of homes are located south of Hilliard Dr.; homes along Laurel and Riverwood are a little more expensive than in rest of area. The area's eastern boundary adjoins the Metropolitan Park system. Free from any detrimental influences; local transportation is poor but this inadequacy is not considered detrimental inasmuch as all residents own automobiles. It is a fine quiet and clean community with pride of ownership very much in evidence. No heavily trafficked arteries. This area is accorded a good first grade rating in view of its rapid growth and present new construction activity.

HOLC Neighborhood Assessments

1. POPULATION: a. Increasing _____ Decreasing _____ Static X
 b. Class and Occupation Laborers
 c. Foreign Families _____ % Nationalities — d. Negro 100%
 e. Shifting or Infiltration none

8. DESCRIPTION AND CHARACTERISTICS OF AREA: This small totally colored community was result of an independent movement and development surrounding the construction of their church in this area some 25 yrs. ago. No streets are paved and lack of maintenance through the years has given this area its name of "Shantytown". Presence of this community has had a very detrimental effect on surrounding area property values, particularly to the immediate south. Utilities are available to area. This section is now about 75-80% built up and, apparently, is solidly entrenched, in fact this area, prior to Miles Heights annexation to Cleveland in 1932, was able to elect a negro as Mayor of Miles Heights.

Area will remain static but may spread into Garfield Heights (S.W.) if the purchasing power of the colored residents increases enough to buy this property, (lying to south) now in the \$1800-\$3500 bracket which has virtually no market for white due to proximity to this colored neighborhood.

9. LOCATION Cleveland (East Side) SECURITY GRADE 4th AREA NO D-10 DATE 9/9/39

HOLC Neighborhood Assessments

1. POPULATION: a. Increasing _____ Decreasing _____ Static X
- b. Class and Occupation Laborers - WPA Workers - Relief Clients
- c. Foreign Families 75% Nationalities Roumanian - Hungarian Italian - Italian - German
(including second generations)
- d. Negro family
- e. ~~Shifting or~~ Infiltration of Cosmopolitan

8. DESCRIPTION AND CHARACTERISTICS OF AREA: This area, situated in the extreme north-east corner of Cleveland's west side, is one of the ^{city's} oldest residential neighborhoods. Originally settled by Germans and Irish, it slowly bowed to Cleveland's expansion and infiltration of other foreign peoples. Roumanians, Hungarians and Italians migrated here about 30 yrs. ago and now comprise the predominating population elements. The Roumanians settled around W. 48th St. district -- the Hungarian and Italian people located between W. 54th & W. 73rd Sts., (largely north of Detroit Ave.) Several old German families are still found along the eastern and central part of the area.

The earliest development in this area was along W. 28th and W. 29th Sts. and here many of the homes are 75 to 80 yrs. old; now fully developed, the area was built up with large 2 sty. single dwellings, many of which were converted into 2-3 family units and rooming houses; (there are a few 1½ sty. homes on each street interspersed with the large converted type).

The houses along W. 58th St. and west thereof are in better repair condition -- are more modern -- have full basements and average 25-30 yrs. Franklin Ave. was once the fashionable district of the west side; two family homes (with round basements) on this street sell for around \$3500-\$5500 singles and doubles without basements or round cellars range from \$1800-\$3500.

The main business section of west-side Cleveland is located here; retail business shops run solidly along Lorain, Detroit, Fulton and W. 25th St. There was a small

THE ERA OF THE BULLDOZER

Suburban Expansion, Urban Renewal and Highway Construction

A Number of Federal Policies Would Radically Reshape Urban America

The Build Out of Suburbia

- The FHA and the creation of the standard mortgage 1934
- The GI Bill 1944
- Federal Highway Act 1953
- Infrastructure Subsidizes for New Suburbs

The Demolition of Urban Areas

- Urban Renewal 1949
- High rise public housing
- Berman v Parker (1954): Justification of using eminent domain for blight removal
- Federal Highway Act 1953
- Dismantling of street car systems

Suburban Growth & Race

- New developments restricted to communities of color & African American communities redlined
- In the prime suburb-shaping years (1930-1960)
 - Less than one-percent of all African Americans were able to obtain a mortgage
- Formation of “White” America
 - Suburbia becomes the first space in which White ethnic identities dissolve

“If a neighborhood is to retain stability, it is necessary that properties shall continue to be occupied by the same social and racial classes. A change in social or racial occupancy generally contributes to instability and a decline in values.”

–Excerpt from the 1947 FHA underwriting manual

Urban Renewal & Race

- Renewal projects predominately impacted poor communities and racial and ethnic communities
 - 2/3's of displaced were African American or Latino
- Massive displacement
 - E.g. Atlanta (1 in 9 people in the city displaced)
 - Financial and psychological impacts from relocation
- People of color relocated into already overcrowded areas and new areas of high density public housing
- More homes destroyed than those rebuilt
 - 90% of housing destroyed was not replaced

Urban Renewal in Cleveland: Case Study

- Conceptual Drawing for the \$250 million dollar Erie View Urban Renewal Project

- The City of Cleveland undertook multiple urban renewal projects in the 1950's and 1960's
- Most projects failed to meet expectations
- Similar patterns of racialized displacement
- The racially segregated Hough Neighborhood becomes overcrowded as African Americans displaced by Urban Renewal relocate
 - Seven days of riots in July 1966

Which Neighborhoods Were Most Affected by Highway Construction?

KIRWAN INSTITUTE
for the Study of Race and Ethnicity

CIVIL RIGHTS PROGRESS

The Era of Progressive Reform

Cleveland in Transition

Government and society were changing – and so was the way that people react to and interact with them.

Federal Acts

1968: Fair Housing Act

- Technically Title VIII of the Civil Rights Act of 1968
- Equal housing opportunities for sale, rental, and financing regardless of race, creed, or national origin
- Expansions
 - Gender included since 1974
 - People with disabilities and families with children included since 1988

1970: National Environmental Policy Act

- Requires federal agencies to consider the environmental impact of their decisions

1977: Community Reinvestment Act

- Promotes lending to low- and moderate-income neighborhoods
- Affects the creation of new bank branches

Norm Krumholz and Equity Planning

- City of Cleveland Planning Director, 1969-1979
- Defined in his own words: “in their work they deliberately sought to redistribute power, resources, or participation away from local elites and toward poor and working-class city residents”

Cuyahoga Land Bank

- “strategically acquire blighted properties” and “return them to productive use”
- “Unprecedented” agreements with HUD and lenders
 - 2009: Fannie Mae agreed to sell homes to the Land Bank for \$1 while contributing \$3500 to demolition costs
 - 2010: HUD agreed to give the Land Bank a chance to buy HUD homes valued at less than \$20,000 for \$100
 - 2011: Wells Fargo and Bank of America agreed to donate properties and provide demolition funds

City of Cleveland Land Reutilization Program

- Redeveloping vacant land for the “economic, social and environmental betterment of the City”
- Lots sold for \$200 if used for:
 - New housing construction
 - Residential side yard expansion
 - Agricultural/garden use
- Examples
 - Ohio Technical College expansion
 - Mansfield and Brenda Frazier used $\frac{3}{4}$ acre to cultivate a vineyard
 - 58 new homes in Slavic Village

Impacts of Desegregation: Ludlow

- Located between Cleveland and Shaker Heights
- Part of the Shaker Heights City School District
- Ludlow Community Association
 - Founded in 1957 for peaceful integration as a response to the bombing of John Pegg's house in 1956
 - Controversially held open houses for whites exclusively
- Ludlow “set a national example for integration”
- Today, 85% of residents are African American

Impacts of Desegregation: Schools

- Many people moved to Ludlow to obtain a quality education for their children
- In Glenville and many other neighborhoods, schools were so overcrowded that students attended classes for only half the day and there were waiting lists to attend kindergarten
- 1964: Reverend Bruce Klunder was accidentally killed by a bulldozer while protesting the construction of new segregated schools

Impacts of Desegregation: Glenville

“Urban renewal is black removal.”

- Leo Jackson, 24th Ward Councilman

- In the 1950s, African Americans moved into the neighborhood as the Jewish population moved out
- Glenville became overcrowded and blighted and began to lose businesses
- Jackson opposed the “Glenville Plan” for urban renewal
 - Fought slum landlords
 - Wanted to combat blight through strict zoning standards
- July 1968: the Glenville Shootout

Heights Community Congress

- Fair housing organization founded in 1972
- Educated first-time homeowners about lending and home improvement
- Tested realtors by sending white and black couples to ask about properties and provided resources for families to sue if discrimination was present
- Heritage Home Tours
 - Highlight historic homes
 - Give awards to residents who helped maintain their homes and neighborhoods

Community Development Corporations

- Non-profit organizations
- Serve and support neighborhoods in many ways, from education to economic development
- Over 30 CDCs across Cleveland advocating for their communities and promoting equity

Cleveland's Legacy

- Innovative leadership
 - National attention and renown
 - Both individuals and organizations
- Tough times and struggles with integration
 - Strength of national policies that did not support urban areas
 - Institutionalized and individual prejudice

KIRWAN INSTITUTE
for the Study of Race and Ethnicity

POST CIVIL RIGHTS ERA

Contemporary Challenges

Contemporary Issues Challenging Health Equity and Racial Equity: Mass Incarceration

- Mass Incarceration policies are a comprehensive and well-disguised system of racialized control that functions in a manner strikingly similar to Jim Crow
- Disproportionately effects people of color, poor people, and women
- Creates an under caste of people who are relegated to the fringes of American society through overt discrimination and permanent social exclusion- No longer allowed to vote

Cuyahoga County's State Prison Intake in 2012 was 67% African American

High Prison Entry Zip Codes: State Inmates Incarcerated in 2008

Zip 44104- 96.7% black. 310 incarcerated
Zip 44105- 72.4% black. 453 incarcerated
Zip 44103- 81% black, 241 incarcerated
Zip 44108- 93.7% black. 359 incarcerated

Effects of Mass Incarceration on Communities

- Increase in single family homes
- Eliminates ability to qualify for welfare, public housing, and student loans
- Loss of lifetime earning potential
- 1997 Adoption and Safe Family Act- Once a child has been in foster care for 15 of the most recent 22 months- the ASFA requires the state to file a petition to terminate parental rights
- Children of incarcerated are 5 times more likely to end up in jail themselves

Effects on Public Health

- 90% of states withdraw Medicaid when a person is incarcerated
- Upon re-entry, ex convicts have a 12.7 times higher risk of death than the and 129 times higher risk of drug overdose than the general population
- Children become collateral damage—exposed to risky behaviors of parents because of lack of options or end up in the foster care system.
- Racial Disparities in health outcomes intensify
- Mass Incarceration is a mass exposure to stress and trauma—viewing mass incarceration as a form of violence allows us to examine the impacts and its health consequences

Great Recession

- Period from 1991 to 2001 was a time of major black capital accumulation
 - Initial recession in 2001 and great recession of 2007 hit black people particularly hard
 - Foreclosures disproportionately concentrated in black and brown communities
- Job loss and homelessness has a negative impact on health outcomes
 - Economic Policy Institute : Black net worth fell from \$13,400 to \$2,1270. White net worth fell from \$134,280 to \$97,600
 - Department of Labor: Since the end of the great recession, general unemployment has fallen from 9.4 to 9.1 while black unemployment has increased from 14.7 to 16.2 percent
